ABSTRACT OF THE DISCLOSURE

5 An electrically controlled braking system including an  
electrically controlled brake for braking a vehicle wheel,  
an electric power source device, a brake control apparatus  
for controlling an electric energy to be supplied from the  
electric power source device to the brake, for thereby  
controlling an operation of the brake, when a brake  
operating member is operated, and a switching device  
disposed between the electric power source device and the  
10 brake control apparatus, and wherein the switching device is  
turned on for connecting the electric power source device to  
the brake control apparatus, in response to an operation of  
the brake operating member.
